

original claims

CLAIMS

1. A bib, comprising:

a body made of flexible material;
means for attaching the body around an infant's neck;
means for attaching the body around an infant's torso; and
one or more loops, each loop having two ends secured to the body.

2. The bib according to claim 1, wherein the flexible material is a fabric.

3. The bib according to claim 1, wherein the one or more loops each comprise a flexible, durable material having a maximum cross sectional dimension less than about 0.50 inch (1.25 cm).

4. The bib according to claim 1, wherein the flexible, durable material is selected from the group of materials consisting of a strip of cloth material, a strip of plastic material, a length of string, a length of cording, a length of lace, a length of ribbon, and a length of rope.

5. The bib according to claim 1, wherein the two ends of each of the one or more loops are secured to the bib by sewing.

6. The bib according to claim 1, wherein the two ends of at least one of the one or more loops are secured adjacent to each other with the loop fold oriented downwards.

7. The bib according to claim 1, wherein the two ends of at least one of the one or more loops are secured apart from each other.

8. The bib according to claim 1, further comprising at least one detachable device attached to at least one of the loops.

9. A bib, comprising:

Laura S. Nease

CLAIMS

1. (AMENDED) A bib, comprising:
 - a body made of flexible material;
 - means for attaching the body around an infant's neck;
 - means for attaching the body around an infant's torso; and
 - (one or more) a plurality of loops, each having two ends secured to the body
 - wherein the two ends of at least one, or plurality, of loops are secured adjacent to each other with the loop fold oriented vertically so the loop hangs down in the front when the bib is upright or in normal use.
2. The bib according to claim 1, wherein the flexible material is a fabric.
3. The bib according to claim 1, wherein the one or more loops each comprise a flexible, durable material having a maximum cross sectional dimension less than about 0.50 inch (1.25 cm).
4. The bib according to claim 1, wherein the flexible, durable material is selected from the group of materials consisting of a strip of cloth material, a strip of plastic material, a length of string, a length of cording, a length of lace, a length of ribbon, and a length of rope.
5. The bib according to claim 1, wherein the two ends of each of the one or more loops are secured to the bib by sewing.
6. (DELETE) The bib according to claim 1, wherein the two ends of at least one of the one or more loops are secured adjacent to each other with the loop fold oriented downwards.
7. The bib according to claim 1, wherein the two ends of at least one of the one or more loops are secured apart from each other.
